

NEW

CND-II DRUM BLAST

FEATURES

Efficient and Uniform Shot
Synergistic stirring by drum rotation and vertical rocking achieves.

Small Products and thin Products are No Problem
Drum blast can process not only cast and forged products, but also bolt, nut, and pressed products.

Reliable Product Discharge is Possible
Lot management is easy, because the product can be discharged completely.

Rotary drum with vertical vibration mechanism
Our unique drum design improves performance. Adding vertical vibration to the conventional rotation multiplies the stirring effect and allows uniform finishing in less time.

Multi-Function Touch Panel

Safety functions for operator safety
A safety light curtain that detects humans.
