

DZBX-2MT ZINC BLAST

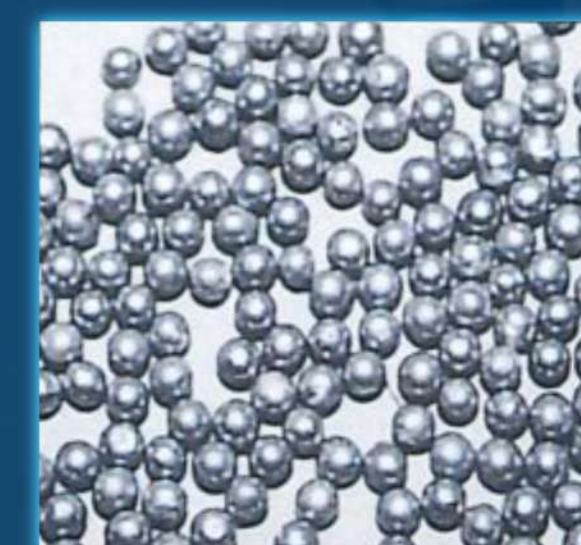

FEATURES

- 
No damage at product surface
 The machine is specially designed for blasting items that cannot be treated with tumbling blast application. DZB produces superior projection for aluminum die-casting products.
- 
Safety blasting with zinc shot
 DZB is designed to use with zinc shot that can prevent explosion when involving with aluminum fine dust.
- 
Compact size
 Compact size of the machine makes an installation easier. Equipped with 2-station, the machine allows operator to load /unload the products in the front while blasting on process at the back.

The Double-Station Design Promotes Greater Efficiency
by allowing products to be loaded and unloaded during blasting treatments.

Blasting media for die-cast products
Our advanced shot is most suitable for die-cast products. Safe work environment. High deburring capacity and beautiful white gloss finish.

SPECIFICATION DZBX-2MT

Capacity	Blasting area per jig (mm)	Ø400 x 600H (Max)
	Weight of work piece (including jig)	20kg / jig (Max)
Impeller	Motor capacity (kW)	5.5kW x 4P (2 units)
Hanger	Number of hanger	2
Dust collector	Air volumn (Nm3/min)	15

* To improve quality of our product, changes of specification may apply without prior notice

Suitable for deburring thin-walled die-cast products without warping them

For deburring die-cast products

3-in-One SOLUTION

IN ASSOCIATION WITH SIAMBRATOR

We are determined to meet our customers' most satisfaction. That is the reason behind our 3-in-1 business solution by offering cutting edge technology and equipment, medias and abrasives, and after-service maintenance.
