Surface Treatment & Sinto
Introduction of machining processes

Sand Remover

Sand removal from as-cast parts

Deburring

Remove everything from thin films to stubborn deposits

Cleaning

Meeting a variety of deburring requirements like leaving edges or avoiding stains

Etching

Control surface roughness from Ra0.02 to Ra35 µm

Polishing

Ultra-smooth polishing for surface roughness of Ra0.015 µm or less

Impacting

Significantly improve fatigue strength

Chipping

Microprocessing Fine processing at micro levels under dry/non-chemical conditions
